

1

Full height, embossed steel panel; maximum protection! Maximum visibility!

2

The floor is a single piece of 15mm thick birch and its top fitted in case you ever want to replace it. Handy recessed lashing rings around the periphery are tested to 800kg!

3

Three level load lashing and a 400kg gantry capacity; you can lash loads of all shapes and sizes!

4

Double skinned aluminium side/tailboards used throughout, so your body will look this good for years! The smooth, seamless finish is perfect for your livery!

5

Aluminium corner posts are removable to help you unload the vehicle with no obstructions.

6

Super flexible to help you work better! Add safety rails, toolboxes, tail-lifts, additional rope hooks, footsteps, grab handles...and so on.
